

Amendments to the Claims

Please amend the claims as follows:

- 507
B17
1. (currently amended) A system for onsite backup of internet-based data comprising:
- a central computer;
 - a client computer;
 - a communications link between said central computer and the Internet;
 - a communications link between said client computer and the Internet;
 - at least one database containing a plurality of data records accessible by said central computer, each data record containing a client identification number;
 - software executing on said central computer for receiving a data backup request;
 - software executing on said central computer for transmitting said data backup to said client computer for onsite backup of internet-based data on said client computer.
- A2
2. (currently amended) The system of claim 2 1 further comprising of software executing on said client computer for storing said data backup in a location accessible to said client computer.
3. (original) The system of claim 2 further comprising of software executing on said central computer for retrieving said data backup.

A2

4. (currently amended) A system for onsite backup of internet-based data comprising:

- a central computer;
- a client computer;
- a communications link between said central computer and the Internet;
- a communications link between said client computer and the Internet;
- at least one database containing a plurality of data records accessible by said central computer, each data record containing a client identification number;
- software executing on said central computer for receiving commands from said client computer;
- software executing on said central computer for receiving data from said client computer;
- software executing on said central computer for storing said received data in said database;
- software executing on said central computer for generating a data backup request form;
- software executing on said central computer for transmitting said data backup request form through the internet;
- software executing on said central computer for receiving a reply to said data backup request form;
- software executing on said central computer for transmitting said data backup to said client computer for onsite backup of internet-based data on said client computer.

5. (original) The system of claim 4 further comprising of software executing on said client computer for storing said data backup in a location accessible to said client computer.

6. (original) The system of claim 4 further comprising of software executing on said central computer for retrieving said data backup.

7. (currently amended) A system for onsite backup of internet-based data comprising:

- a central computer;
- a client computer;
- a communications link between said central computer and the Internet;
- a communications link between said client computer and the Internet;
- at least one database containing a plurality of data records accessible by said central computer, each data record containing a client identification number;
- software executing on said central computer for receiving commands from said client computer, for receiving data from said client computer, and for storing said data in said database;
- software executing on said central computer for receiving a data backup request and for receiving a data format conversion request;
- software executing on said central computer for retrieving said data from said database and for converting said data to a format corresponding to said data format conversion request;
- software executing on said central computer for encrypting said data backup;
- software executing on said central computer for transmitting said data backup to said client computer for onsite backup of internet-based data on said client computer; and
- software executing on said client computer for decrypting said data backup.

8. (original) The system of claim 7 further comprising of software executing on said client computer for storing said data backup in a location accessible to said client computer.

9. (original) The system of claim 7 further comprising of software executing on said central computer for retrieving said data backup.
